*as of yet the remarkable and highly influential textual form of euclidean mathematics has not been considered from a literary aesthetic perspective by its extreme standardization and seeming non literariness it appears to defy such an approach this book nonetheless attempts precisely a literary aesthetic study of the language and style of euclid s elements focusing on book i it aims to find out what is literary about the form and what motivates this form as form in doing so it employs the concept of clarity asking how is the textual form related to logical and communicative clarity that is how far is the omnipresent standardization necessary for the accomplishment and successful communication of the proofs based on a close analysis of the standardization at all levels of the text lexicon grammar structure and especially diagram it argues that the textual form of the elements is standardized beyond logical communicative purposes and that it is in this sense aesthetic the book exposes the unexpected literary dimension of euclid s elements provides a new interpretation of the peculiar form of the work and offers a model for determining the role of clarity not only in greek theoretical mathematics*

*in the medieval world geographical knowledge was influenced by religious ideas and beliefs whereas this point is well analysed for the latin christian world the religious character of the arabic islamic geographic tradition has not yet been scrutinised in detail this volume addresses this desideratum and combines case studies from both traditions of geographic thinking the contributions comprise in depth analyses of individual geographical works as for example those of al idrisi or lambert of saint omer different forms of presenting geographical knowledge such as to diagrams or globes as well as performative aspects of studying and meditating geographical knowledge focussing on texts as well as on maps the contributions open up a comparative perspective on how religious knowledge influenced the way the world and its geography were perceived and described int the medieval world*

*vols 39 214 1874 75 1921 22 have a section 2 containing other selected papers issued separately 1923 35 as the institution s selected engineering papers*

*nsa is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating*

the prestigious inis database which began in 1970 nsa existed as a printed product volumes 1 33 initially created by doe s predecessor the u s atomic energy commission aec nsa includes citations to scientific and technical reports from the aec the u s energy research and development administration and its contractors plus other agencies and international organizations universities and industrial and research organizations references to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included abstracts and full text are provided if available

published papers whose appeal lies in their subject matter rather than their technical statistical contents medical social educational legal demographic and governmental issues are of particular concern

vols 10 11 include meteorology of england by james glaisher as seperately paged section at end
